Pairing with Apple Find My

- Ensure **Bluetooth** is on and open the Find My app on your iPhone or iPad.
- Hold the Smart Tag near your device to connect.
- Complete the setup and confirm your item appears in the Find My map.

Setting Up the Smart Tag Pairing with Apple Find My

- Open Find My
- Add Item > Other Supported Item
- Hold near device to connect
- Name the item and complete setup

Using the DNA Labels

Placement Tips

- Place DNA labels in visible locations on your items to serve as a deterrent and mark ownership.
- Ensure the surface is clean and dry for secure application.

Why Use DNA Labels?

- Labels act as both a visible theft deterrent and a forensic link, proving ownership in case of recovery.

Applying the Labels

- Peel off the backing and press the label firmly onto your item.
- Apply labels on multiple items for maximum coverage.

Make sure you register your DNA labels in your ProtechDNA account, so the PIN is linked to you as the owner.

These Forensic stickers have tiny microscopic dots embedded in the adhesive so if they are removed the dots will remain on the item for law enforcement to authenticate ownership

Registration Process

How to Register

- Go to **ProtechDNA.com /Register.**
- Log in** or create a free account.

MY ACCOUNT

- Manage Profile
- Dashboard
- My Profile
- My PIN Numbers
- My Smart Tags**

About DNA Microdots

Invisible yet Unmistakable Mark of Ownership

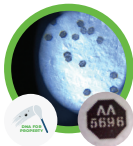

- Each microdot is a microscopic identifier smaller than a grain of sand, making it invisible to the naked eye.
- Thousands of microdots are suspended in each adhesive application, providing multiple forensic identifiers across the applied surface.

Each Microdot Carries a Unique PIN

- Each microdot is etched with a unique PIN that is registered to the owner, creating an unbreakable link between the item and its true owner.
- PIN is stored in a secure, online database accessible only to registered users and law enforcement.

Trusted by Over 10,000 Law Enforcement Agencies Nationwide

- Each microdot is etched with a unique PIN that is registered to the owner, creating an unbreakable link between the item and its true owner.
- Law enforcement agencies can use specialized tools to detect the microdots, identify the PIN, and link it back to the owner in ProtechDNA's secure database.

Program Details and Benefits

Powerful Protection, Seamless Recovery

Dual-Layered Security

- Combines forensic DNA microdots with real-time tracking. Microdots carry a unique PIN that permanently links your items to you, while smart tags provide live location tracking.

Theft Deterrence

- Visible DNA labels signal to potential thieves that items are registered and traceable, making them harder to resell. Even if labels are removed, microdots stay embedded as proof of ownership.

Lifetime Peace of Mind

- Easy registration provides lifetime protection, linking your valuables to you for as long as you own them.

Trusted by Law Enforcement

- Over 10,000 law enforcement agencies can access ProtechDNA's network, allowing immediate verification of ownership if a marked item is recovered.

Simple Recovery Process

- Registered items are cross-referenced with pawn and resale platforms, improving recovery chances if stolen. ProtechDNA's support team helps guide you through the process.

The DNA for Property Program combines cutting-edge forensic technology with an expansive law enforcement network to provide unparalleled protection. Whether at home or on the go, you can rely on dual-layered security, strong theft deterrence, and a seamless recovery process, all designed to protect what matters most.
